in MatthewSeo   ↖ MyApp   ○ Rongjuni   ⊚ CodeWars

Creative junior developer seeking to utilize dynamic coding skills as well as collaborative skills in order to contribute to a cohesive team environment. Capable of learning new programming languages and technologies as well as completing projects in a timely manner.

🎓 EDUCATION

TrueCoders
Web Development

CodingApple
Front-end Development

University of Illinois, Urbana-Champaign
M.B.A

George Mason University
B.S in Accounting

⚛ SKILLS

React   NodeJS   Javascript   HTML   CSS   Git   Github

JSON   SQL   REST API   Bootstrap   Context API   MongoDB

ExpressJS   NoSQL   Socket.IO

💼 EXPERIENCE

System Adminitrator / Technical Support
SOS International LLC
- Utilize Microsoft SQL to pull massive financial data from the database and alter it to transform raw data into meaningful information to support management decisions.

- Create an importable CSV file from MSSQL by creating working tables and combining multiple financial statements for subsidiaries.

- Assist ChromeRiver end users by setting up their accounts granting limited access based on access level and troubleshooting when users experience technical issues.

- Manage system (CostPoint) users by giving or limiting user access to specific applications and approval processes.

- Periodically check if the system is properly running. Otherwise, clear users who are stuck in steps before the table update so other users don't experience a delay.

📁 PROJECTS

Call Pokemon ⧉
Go to Github ⧉

- Developed for a 3-year-old daughter who loves Pokemon and throws an occasional unstoppable tantrum anywhere
- Built with React and bootstrap
- Utilized Axios to fetch the open API provided
